SUMMER KIDS WORKSHOPS
Don't let this summer be a boring one for the kids, what better than having them learn while having fun?! Summer Kids Workshops program offers a variety of different workshops from LEGO Robotics, Kids in the Kitchen, Operation Fit Kids to Mini Farm, Welding and Outdoor Exploration! Spaces are limited. Each workshop is a week long from either 9-12pm or 1-4pm during the month of June.

Registrations begin April 18 and close on May 18. You can register your child online, www.linocc.org, or by filling out the brochure each child will bring home from school. If registering by filling out the brochure, please drop off the form at our office. Each workshop is $50.

PLEASE READ IF REGISTERING ONLINE: Unfortunately, when registering online you will have to pay and register for each class individually. You can't add them all to your cart and do one check out. We apologize for the inconvenience this may cause. Additionally, there will be a $2 processing fee for each workshop you register for online.

If you have any questions or concerns please contact Louisa Hoffman at 765-659-6380 ext 1824 or hoffmanl@frankfort.k12.in.us

HISSET TESTING
On April 19 and 21, the HiSET test, formerly known as the GED, will be offered at the Learning Network office. The exam will take place during the day from 10am-3pm. If you are interested in taking the exam, please call our office, 765-659-6380 ext 1822.

Need help preparing for the exam? We offer HiSET prepping classes in the mornings and afternoons. Classes take place on Tuesdays and Thursdays from 10-2pm or 4-8pm. If you are not yet ready to take the test, the teacher will help you prepare for the next time the test is offered at the office.

For more information or to start taking classes contact us.

DRIVER'S ED PREP CLASS
THURSDAYS 6-8PM
CONVERSATIONAL SPANISH
TUESDAYS 6-8PM
MARCH 8-MAY 31
WORLD AUTISM AWARENESS DAY

Autism affects about 1 in 54 children in the United States, according to the Centers for Disease Control. Autism, or autism spectrum disorder (ASD), refers to a wide range of conditions characterized by challenges with social skills, repetitive behaviors, speaking, and nonverbal communication.

There are many subtypes of autism, most are influenced by a combination of genetic and environmental factors. Because autism is a spectrum disorder, each person with autism has a different set of strengths and challenges. The ways in which people with autism learn, think, and solve problems can range from high-functioning individuals to severely impaired individuals. Some people with ASD may require significant support in their daily lives, while others may need less support and in some cases live fully independently.

Several factors can influence the development of autism, and it is often accompanied by sensory sensitivities and medical problems such as gastrointestinal (GI) disorders, seizures, or sleep disorders, as well as mental health problems such as anxiety, depression, and attention problems. Autism indicators usually appear at 2 or 3 years of age. Some developmental delays can appear even earlier, and can often be diagnosed as early as 18 months. Research has shown that early intervention leads to positive lifelong outcomes for people with autism.

April 2nd is Autism Awareness Day. Learn about autism and ways you can include and accept those with autism. One of the ways you can do more about autism is to participate in the "Walk a mile for Autism". The walk will take place on April 10th from 1-3pm at the TPA park. Those who would like to participate must report to shelter #1. There will be music while you walk provided by Good Times Professional Audio. For more information, search 2022 Walk-a-mile-for Autism event on Facebook.
